JSW Steel Limited ("JSW") recognises the importance of conserving and preserving the environment to ensure long term sustainability across value chain and around areas of operation.

JSW is committed to:

1. Addressing environmental issues through efficient use of natural resources, promote use of renewable energy, minimization of wastes, water management, protecting the biodiversity and reducing carbon footprint
2. Regular and periodic evaluation of the environmental impact of the operations and adoption of appropriate measures to mitigate adverse effects
3. Effective implementation of environmental management system to prevent, mitigate and control environmental damages
4. Deploying necessary resources for uses of clean technologies and to comply with applicable environmental laws, regulations and agreements.
5. Support and promote good environmental practices along with enhancing awareness, skills and competencies amongst its employees, associates, suppliers and communities
6. Reporting the environmental performance to stakeholders in a fair and transparent manner
