

	Quality Standard Operating Procedure	QSOP No.: JSW-EV-001
		Page No.: 1 of 1
	Environmental Policy	Revision No. 4
		Revision Date: 12/02/20

JSW Steel (USA) Inc. is committed to managing environmental issues as an integral part of our business. We ensure the environmental integrity of our processes, products, and facilities at all times. We do so by adhering to the following principles:

- LEGAL COMPLIANCE:** JSW is committed to meet or exceed the regulatory requirements imposed by local, state and federal government bodies. JSW maintains an Environmental Department dedicated to monitor regulatory requirements applicable to JSW's business activities and product, track changes in regulatory requirements, and ensure overall regulatory compliance.
- ENVIRONMENTAL STEWARDSHIP:** JSW employs an environmental management system and procedures to minimize impact on the environment and health. JSW employs processes that are appropriate to achieve this result. JSW also strives to minimize utilization of natural resources by reducing waste generation through process improvements, by reusing by-products, and recycling.
- CONTINUAL IMPROVEMENT:** JSW continuously seeks opportunities to improve its environmental performance by establishing objectives, measuring progress and frequently reviewing its environmental policies for reduction of its environmental footprint.
- INVOLVEMENT & COOPERATION:** JSW promotes and communicates our commitment by providing training and support to our employees and by establishing proactive coordination with suppliers to meet its environmental objectives.
