GDP Growth Forecasts (%YoY)

PMI - Manufacturing

CPI - Inflation (YoY, NSA)

- 2024 Global GDP growth to be stable, and marginally higher than previous forecast. Improvement in global Manufacturing PMI in Q1 CY24, and continued disinflation are positives. However, geopolitical risks have risen and need to be watched
- US:** Growth holding up reasonably well with resilient labour markets and consumption. Disinflationary process continuing, though with some speed bumps – causing dilution of rate cut expectations
- Eurozone:** Weakness in consumption and manufacturing but growth appears to be bottoming out. Expected rate cut in the near-term given soft inflation prints to support recovery
- China:** Strong growth in Q1 CY24 with positive trend in manufacturing and auto production. While property sector remains a drag, FAI ex-real estate development is up 9.3%. Targeted stimulus to support the economy likely to continue
- Japan:** Expect modest recovery from lows of recent quarters, supported by strong wage hikes and growth in exports

Global growth steady with moderate improvement in outlook

Crude Steel Production – Jan-Mar (mt)

Finished Steel Demand (mt)

China Steel Production and Export (mt)

HRC Prices US\$/t

Raw Material Prices (US\$/t)

Exports from China remain a concern for global industry; coking coal prices moderated while iron ore remains firm

PMI – Manufacturing & Services

GST Collections (₹ Lakh Cr)

Merchandise Exports (US\$ bn)

Quarterly Domestic Sales ('000s)

- Robust growth momentum continues, led by industrial sector and capital formation
- Public capex in infrastructure driving the growth in investments with central capex up 36.5% during Apr-Feb'24; thrust on infrastructure expected to continue
- Private capex likely to pick-up with increasing utilisations supported by healthy balance sheets. Energy transition and PLI are further tailwinds
- Strong outlook for both public and private housing
- Healthy YoY growth in 2W, PV and LCVs during Q4 FY24 even as M&HCVs and tractor sales had a soft patch
- Elevated consumer confidence and moderation of inflation likely to support consumption growth; expectations of above normal monsoon to drive rural recovery
- Healthy foreign exchange reserves driven by export growth and positive outlook on capital flows amidst rising geopolitical risks

Growth momentum likely to continue with positive trends across key sectors and resilient macroeconomic profile
